Web Developer

Profile

I am a web development expert with over 3 years experience implementing and supporting LAMP based web solutions. I use source control; bug tracking applications, relational databases and RAD methodology on a daily basis. I am in pursuit of a challenging and stimulating development role.

Experience

University Of Ulster, Jordanstown, Co. Antrim *Web Developer, Apr. 2009 – Oct. 2011*

- Created a Zend Framework-driven global announcements system with an ExtJS front-end, which is used to contact targeted groups of staff and students through email and uPortal.
- Implemented a CakePHP projects metadata database used by the Information Services Directorate to store information about applications within their jurisdiction.
- Responsible for deploying fixes to mission-critical systems including the University helpdesk system, corporate website and project portfolio system.
- Developed a jQuery UI/Zend Framework application that allows support providers in the Student Support department to record client sessions and receive payment for their care.
- Designed a jQuery powered web form for Finance that allows external suppliers to update and submit information about their company to the University.
- Devised a PHP MVC/jQuery based exam marks reporting facility used by course directors.

Rehabstudio, Belfast, Co. Antrim *Web Developer, Jan. – Apr. 2009*

- Created the backend to a number of high profile websites for a range of international clients using PHP/CakePHP, Javascript and CSS.
- Responsible for managing services on the agencies test and production servers. Duties included configuring Apache Virtual-hosts, package installation and managing scheduled tasks.

IT Alliance, Belfast, Co. Antrim *Service Desk Agent, Aug. – Dec. 2008*

- Gained experience resolving hardware & software faults, troubleshooting TCP/IP networking issues and managing user accounts through Active Directory.
- Developed a sophisticated .NET application with a MSSQL back-end that interfaced with the helpdesk to expedite the call logging process by as much as 25%.

- Redeveloped the University's Press Release system to allow the Public Affairs department to issue press releases independently, saving the team 8-10 hours of work per week.

Technical

Skills

Matrix

Web Development			Web Design		
Technology	Experience	Rating 1-5 (1 beginner and 5 expert)	Technology	Experience	Rating 1-5 (1 beginner and 5 expert)
(X)HTML	10 years	5	Dreamweaver	6 years	5
SEO	9 years	5	Fireworks	6 years	4
PHP	6 years	4	Flash	4 years	3
MySQL	6 years	4	CSS	4 years	4
XML	6 years	4	Photoshop	3 years	2
Apache	4 years	4	Software Development		
Javascript	4 years	4			
jQuery	3 years	3			
ASP	2 years	2			
XSL	2 years	2			
Perl	1 year	2			
ASP.net	½ year	1.5			
Rails	½ year	1.5			
			Technology	Experience	Rating 1-5 (1 beginner and 5 expert)
			VB.net	3 years	3.5
			C	1 ½ years	2
			C++	½ year	1
			Java	½ year	1
			C#	½ year	1
